

Nedan guide är en vägledning till val av dimmer till Unisons produkter eller val av Unison produkt till era dimrar. Denna lista kommer att uppdateras efter hand då vi kontinuerligt testat nya dimrar.

Detta är en rekommendation där Unison AB har testat produkten i en viss miljö med vissa förutställningar. Avvikelser kan förekomma men vår ambition är att kunna redovisa ett så verkligt resultat som möjligt.

- Bristande funktion** Denna kombination är ej optimal enligt våra tester. Oftast beror underkännandet på att produkten har otillräcklig dimming. Där kan även finnas andra brister som gör att vi inte rekommenderar denna kombination.
- Ok Funktion** Denna kombination fungerar tillfredställande. Oftast beror bedömningen på att dimmingen inte går ner tillräckligt lågt enligt vår bedömning. Dimmern kan vara känslig eller att det förekommer små störningar.
- Mycket bra funktion** Denna kombination fungerar utmärkt. Här går dimmingen ner till ett väldigt lågt ljusflöde och den har en mycket god funktion.
- Ej Testad** Denna kombination är ej testad.
